1. Introduction

The EOS Executive Dashboard is Primary Group of Builders' internal system for tracking company performance against the EOS (Entrepreneurial Operating System) framework: quarterly Revenue, Collections, Expenses, and Disbursements targets versus actuals, quarterly Rocks (90-day priorities), and an executive-level Scorecard and AI-generated analysis that roll all of it up.

This guide covers the Business Unit Integrator role. A Business Unit (BU) Integrator manages one or more specific Business Units end to end — entering actuals, setting targets, and tracking Rocks for the Companies within their assigned Business Unit(s) — without visibility into the rest of the organization.

Note: Every screen in this guide is scoped to whatever Business Units and Companies your account has been granted access to. The screenshots use illustrative figures, not real company data.

2. Signing In

The sign-in screen.

1. Go to the Executive Dashboard URL your Superadmin gave you.
2. Enter your email address or username.
3. Enter your password and select Sign in.

If this is your first time signing in, or a Superadmin has just reset your password, you'll be asked to choose a new password before you can continue — this is a one-time step.

Note: After 5 incorrect password attempts in a row, the app temporarily locks your account for a short period as a security precaution. Wait for the lockout message to clear, or contact a Superadmin.

3. Navigating the App

Everything lives behind a left-hand sidebar. The items you see are the same for every role — what differs is which ones actually open, and how much data each one shows you.

Sidebar item	Access
Scorecard	Available
Rocks	Available
Financials Dashboard	Available
Financials Data Entry	Available
Financials Target Setup	Available
Compare	Not available to this role
Reports	Not available to this role
AI Analysis	Available
Audit Log	Not available to this role

As a BU Integrator, everything you see is automatically scoped to your assigned Business Unit(s) — the Business Unit and Company filters won't offer an "All" option or any Business Unit you haven't been assigned to. Compare, Reports, and the Audit Log are not part of this role by default; a Superadmin can add access to any of them via a Custom Role if your organization wants to.

- The sun/moon icon in the top-right switches between light and dark theme.
- Your name and role/description show in the top-right; click the person icon to open your Profile.
- The arrow icon next to your name signs you out.
- « Collapse at the bottom of the sidebar shrinks it to icons-only, useful on smaller screens.

4. Your Access at a Glance

You can view and edit Revenue, Collections, Expenses, Disbursements, and Rocks for the Companies in your assigned Business Unit(s) only. Scorecard, Financials Dashboard, and AI Analysis are available but locked to that same scope. Compare, Reports, and the Audit Log show an "access required" screen unless your organization has specifically granted you one of them.

5. Page-by-Page Walkthrough

5.1 Scorecard

The Executive Scorecard, scoped to the Human Capital Business Unit.

Same Scorecard layout as every other role, but the Business Unit filter is locked to your assigned Business Unit — there's no "All Business Units" option.

Use this to check your Business Unit's full-year revenue attainment, net income, and Rocks completion at a glance before diving into the Financials Dashboard for detail.

5.2 Rocks

The Rocks page, scoped to your Business Unit's Companies.

Add, update, and track Rocks for any Company in your Business Unit using + Add Rock and the pencil/trash icons.

This is one of your core responsibilities as a BU Integrator — keeping Rocks current is what feeds the Rocks Completion figure on your Business Unit's Scorecard.

5.3 Financials Dashboard

The Revenue sub-tab, scoped to Human Capital.

Read-only rollup of your Business Unit's Revenue, Collections, Expenses, and Disbursements — Target Distribution Matrix and Operational Grid both stay limited to your Companies.

Use this to double-check the actuals you've entered on Financials Data Entry are landing correctly before quarter-end.

5.4 Financials Data Entry

The screenshot shows the 'Quarterly Data Entry' interface. On the left is a sidebar with a menu: 'Executive D...', 'Scorecard', 'Rocks', 'Financials Dashboard', 'Financials Data Entry' (highlighted), 'Financials Target Setup', 'Compare', 'Reports', 'AI Analysis', and 'Audit Log'. At the bottom of the sidebar is a '<< Collapse' button. The main content area is titled 'Quarterly Data Entry' with a subtitle 'Submit Revenue, Collections, Expenses, and Disbursements for the companies in your assigned Business Unit(s)'. Below the title are four dropdown menus: 'Year' (set to 2026), 'Quarter' (set to Q3), 'Business Unit' (set to Human Capital), and 'Company' (set to PSEFI). Under the 'REVENUE' section, there are two input fields: 'Internal' (with 'Internal amount' placeholder) and 'External' (with 'External amount' placeholder). A blue 'Save All Figures' button is located below these fields. In the top right corner, the user's name 'Jordan Santos' and role 'Human Capital Integrator' are displayed.

Quarterly Data Entry, limited to Companies in your Business Unit.

This is where you submit each quarter's Revenue, Collections, Expenses, and Disbursements for the Companies you're responsible for.

The Company dropdown only ever shows Companies inside your assigned Business Unit(s) — you cannot submit or override figures for any Company outside your scope.

Use the "Notable Expense/Disbursement Items" lists to log any significant one-off items for record-keeping; they're informational only and never change any total.

5.5 Financials Target Setup

Executive D...

- Scorecard
- Rocks
- Financials Dashboard
- Financials Data Entry
- Financials Target Setup**
- Compare
- Reports
- AI Analysis
- Audit Log

Target Configuration
Set Quarter targets for the companies in your assigned Business Unit(s), or set an Annual Target to split it evenly across the year.

Year: 2026 Business Unit: Human Capital Company: PSEFI

Set by Quarter Set Annual Target Bulk Upload

Revenue
Total: P77.175M

Save Quarter Target

<< Collapse

Jordan Santos
Human Capital Integrator

Target Configuration, limited to your Business Unit.

Set quarterly (or annual, split evenly) targets for the Companies in your Business Unit.

Editing one quarter automatically redistributes the difference across that Company's remaining quarters so the annual total stays what it was.

If a quarter shows as locked, a Group Integrator or Superadmin has manually locked it — you'll need to ask them to unlock it before you can make further changes.

5.6 Compare

Executive D...

- Scorecard
- Rocks
- Financials Dashboard
- Financials Data Entry
- Financials Target Setup
- Compare**
- Reports
- AI Analysis
- Audit Log

Side-by-Side Comparison
Pick a Year/Quarter/Business Unit/Company for each period independently.

Comparison access required
You don't currently have access to this page. Ask a Superadmin to grant your account (or a Custom Role assigned to you) view access to Comparison.

<< Collapse

Jordan Santos
Human Capital Integrator

What you'll see if you open the Compare tab without access.

This role does not include view access to the Compare tab. If you believe you should have access, ask a Superadmin to grant it — either by changing your base role or by adding it to one of your assigned Custom Roles under Admin → Roles.

5.7 Reports

What you'll see if you open Reports without access.

This role does not include view access to Reports. If you believe you should have access, ask a Superadmin to grant it — either by changing your base role or by adding it to one of your assigned Custom Roles under Admin → Roles.

5.8 AI Analysis

The AI Analysis page, scoped to your Business Unit.

Pick a Year and Quarter, then Generate Analysis for an AI-written summary of your Business Unit's Revenue, Collections, Expenses, Rocks, and Disbursements for that period.

The Business Unit filter here is locked to your assignment, same as everywhere else.

5.9 Audit Log

What you'll see if you open the Audit Log without access.

This role does not include view access to the Audit Log. If you believe you should have access, ask a Superadmin to grant it — either by changing your base role or by adding it to one of your assigned Custom Roles under Admin → Roles.

6. Common Workflows

Submitting this quarter's actuals

Open Financials Data Entry, pick the Year/Quarter and the Company, fill in Revenue/Collections/Expenses/Disbursements, and select Save All Figures. Repeat for each Company in your Business Unit.

Keeping Rocks current

Update each Rock's status and progress percentage on the Rocks page as work happens through the quarter, rather than waiting until quarter-end — the Scorecard's Rocks Completion figure reflects whatever is saved there in real time.

Setting next quarter's targets

On Financials Target Setup, either edit the upcoming quarter directly (the remaining quarters absorb the difference automatically) or use Bulk Upload if you're setting targets for many Companies at once.

7. Your Profile

The My Profile page.

Click the person icon in the top-right to open your Profile. From here you can update your display name, email address, and optional username, and change your password.

Note: Your role, description, and Business Unit/Company assignments are managed by a Superadmin under Admin → Users — you can't change those yourself from your Profile.

8. Tips & FAQ

I don't see a Company I expect to see on Financials Data Entry.

The Company dropdown only shows Companies inside the Business Unit(s) your account is assigned to under Admin → Users. Ask a Superadmin to check your assignment if a Company is missing.

Why can't I open Compare, Reports, or the Audit Log?

Those three aren't part of the Business Unit Integrator role by default. A Superadmin can grant any of them to your account through a Custom Role if your organization needs you to have it.

I edited a quarter's target and the other quarters' numbers changed too — is that a bug?

No — editing one quarter automatically redistributes the difference across that Company's remaining quarters of the same year, so the annual total stays exactly what it was before your edit.

Appendix: Full Permissions Reference

A quick-reference comparison of what each of the three roles covered in this guide can do.

Page	Group Integrator	Business Unit Integrator	View-Only
Scorecard	View	View	View
Rocks	View, Add, Edit, Delete	View, Add, Edit, Delete (own Business Unit)	View
Financials Dashboard	View	View (own Business Unit)	View
Financials Data Entry	View, Edit	View, Edit (own Business Unit)	View
Financials Target Setup	View, Edit	View, Edit (own Business Unit)	View
Compare	View	Not available	View
Reports	View	Not available	Not available
AI Analysis	View	View (own Business Unit)	View
Audit Log	View	Not available	Not available

Note: This table reflects the intended, correctly-configured design of each role. Exact access for any real account always depends on the specific base role and Custom Role(s) a Superadmin has assigned to it under Admin → Roles.
